

THINGS TO KEEP IN MIND ABOUT OUR:

Avocado Flavor

Our sensatika Avocado flavor booster is an artificial flavoring, yet it's profile is a natural identical flavor. This means that at a chemical level, the formula is exactly the same as a mature avocado.

Facts:

- **Flavor profile:** mature avocado.
- **Recommended Dose:** 3-5ml per every kg/L (2.2 lb/33.8 fl oz) of prepared product.
- **Ideal for:** Cold and frozen products, ice cream (water or dairy based), ice pops, beverages, jelly. However it can be used in guacamoles, mousses, avocado toast mixes and more. In baking it is only recommended for low temperature creations such as cupcakes.
- It is recommended to always use the natural ingredient as all flavorings are really *flavor boosters*. Their job is to enhance and standarize the natural product flavor throughout the entire creation. It is also important to add the natural product because that will give your creation the right texture and consistency.
